THE FACULTY OF ECONOMICS AND MANAGEMENT

The Faculté d’Économie et de Gestion (FEG) is part of Aix-Marseille University (AMU), which is one of France’s oldest and most renowned universities. Dating back to 1409, it is consistently ranked among the top 5 French universities in international rankings like Reuter or Shanghai. The Faculty of Economics and Management welcomes each year around 5,500 students who compose the undergraduate, graduate and continuous education programmes.

Teaching takes place in 4 different locations, in the south of France: Aix-en-Provence, Marseille, Arles and Gap, and the Faculty’s administrative headquarters are located in Aix-en-Provence, on the Jules Ferry site.

A GREAT RANGE OF OPTIONS

The faculty offers a broad array of programs covering most areas in the field of Economics and Management, spread across more than 10 different Bachelor’s degrees, 15 University/Higher Education Diplomas, 11 Master’s degrees as well as Doctoral studies. It also offers two intense programs aiming at preparing students for highly selective competitions giving access to the prestigious French (HEC, Ecole Polytechnique or Ecole Normale Superieure), in collaboration with Lycée Jean-Perrin. These programs are run by 5 departments:

- Département Licence (in charge of undergraduate studies).
- Aix-Marseille School of Economics, (AMSE).
- Institut Supérieur en Sciences de Gestion (ISSG).
- Institut Supérieur de la Finance.
- Institut Supérieur de Management des Organisations.

All these courses/degrees are also available on a continuing-education basis, where a number of arrangements are available for candidates to accommodate their studies with their professional duties (full-time, part-time, work-linked training courses, etc.).

BESPOKE TEACHING

The Faculty of Economics and Management uses an individualized approach from the outset of the first year of the Bachelor’s degree, following an initial assessment of each student’s abilities. Students can then choose from a number of options to fulfill requirements of either the «Parcours Honneur» or «Parcours Réussite», both of which are designed to support them in their studies and professional projects, and to keep them challenged at the right level of their abilities. For example, motivated students may select additional courses from a wide range of introductory, multidisciplinary, technical or linguistic courses.

Students in need of extra help will receive a different kind of support through refresher courses and special coaching. All undergraduate students benefit from small groups in tutorial classes and weekly supervised assignments, a method that has proved effective at improving our students’ skills, grades and achievements.

HIGH QUALITY TRAINING AT THE FOREFRONT OF INNOVATION

The teachers and professors of the Faculty are experts in their respective specialized fields. Attached both to teaching departments and research laboratories, these experts regularly publish and present their research studies at conferences. This relationship between innovative research and teaching ensures the strength and quality of our training.

RESEARCH EXCELLENCE

The Faculty of Economics and Management has five internationally renowned laboratories in the fields of:

- Quantitative Economics (GREQAM)
- Health Economics (SESSTIM)
- Labour Economics and Sociology (LEST)
- Management (CERGAM)
- Logistics (CET-LOG)

Three LABEX (Laboratories of Excellence) hold huge potential for the international dissemination and advancement of first-rate scientific knowledge and expertise. They are:

- AMSE: Globalization and Public Action
- LABEXMED: Interdisciplinary approaches in the Social Sciences
- OT-MED-Earth Institute: Environment and Sustainable Development

EMLOYABILITY AND CAREER SUCCESS

Ensuring our students find success on the job market is our priority. We make this possible through:

- A gradual specialization during training, carefully mixed with a solid general knowledge of the subjects studied.
- Possibility of doing an internship as soon as the 3rd year for some courses.
- Strategic partnerships with a wide network of mentoring corporations and institutions which support and help our students in their professional development.

We help you become an entrepreneur:

INTERNATIONAL NETWORK

Studies abroad are available from the third year of the Bachelor’s Degree to improve students’ language skills and immerse them in a multicultural environment. We have agreements with 56 partner universities, offering students the possibility to complete part of their curriculum abroad, whether as part of an exchange program (ERASMUS, CREPUQ), a double degree or a «Parcours Excellence».

The Faculty currently runs two double degrees: A double degree FEG AMU/HEC-University of Liege, with a semester in English at HEC-Ulmg. A double degree FEG/Ca’Foscari University of Venice, where students from the Aix-Marseille School of Economics who specialize in‘Banking and Financial Economics» can complete part of their Master 2 in Venice and also get the Laurea Magistrale.
